Limited to 20 students per session.

The summer school mathematics curriculum is designed for those students who need to recover credits that were not earned during the previous school year. This program is not designed for students attempting to accelerate through an entire year of mathematics.

The curriculum is self-paced with teacher intervention, as needed. Students will receive an outline of the coursework with recommended completion dates for each unit. All students should expect to work on assignments outside of class throughout the duration of summer school.

To recover credit for the course students must successfully complete daily assignments, chapter assessments, and proficiencies, and final exam.

NO extensions of time will be given for any reason.

Course	Credit Hrs.	Group
Algebra	5	3
Algebra 2	5	3
Geometry	5	3
Advanced Algebra	5	3

Health and Physical Education

General Physical Education

This course is designed to give students basic information regarding a variety of sports. Students will learn to play volleyball, basketball, ultimate Frisbee, flag football, kickball, softball, and tennis. Additionally, students will work on improving their cardiovascular

fitness level, muscle strength and endurance, and study how to improve nutritional habits.

The daily class will consist of a workout designed to elevate the heart rate, complete muscle-toning exercises, and then the students will begin to work on a designated sport. Students will be given instruction on basic rules of the game, techniques, and be given time to practice the concepts taught that day. Students will be expected to be active for the entire 3 hour block.

Students are expected to dress appropriately for the class. Athletic shoes and workout clothes are REQUIRED. No tank tops or sandals may be worn for the class.

*WHS Students - This class is only open to students who have previously failed a semester of Physical Education.

Limited to 20 students per session.

Physical Education

Course #1781-2

8:00 am - 10:15 am

Prerequisite: Students in grades 9 – 12

Level: Sr. High

Group: 3

Healthy Living

Healthy Living will teach students how to develop an understanding of the role nutrition plays in living a healthy life, analyze factors that influence mental health and well-being, evaluate information and apply in a personal way to improve overall health and well-being, examine and identify the components of human sexuality and reproduction.

Limited to 20 students per session.

Healthy Living

Course # 1765-1

10:20 am - 12:35 pm

Healthy Living

Course # 1765-2

1:10 pm - 3:25 pm

Prerequisite: Students must have previously earned a grade of “F” in the course or have permission from secondary excellence in youth coordinator to enroll.

Level: Sr. High

Group: 3

Credits: 4

Science

Earth and Space Science Online

The online course content is the same as Earth and Space Science and can be taken in place of Earth and Space Science. Students cannot have previously taken this course and failed. This class is structured with the student working independently to complete work and prepare for assessments. Students are expected to attend class every day. Students learn from Blackboard resources as well as specific laboratory activities that must be completed at school. An instructor is available during class time as well as via e-mail to address concerns or questions. All assessments will be taken under the supervision of the instructor.

A student who signs up for this should be a self-starter and plan on working independently towards meeting course outcomes. In addition, students who enroll in this course should be comfortable asking for help and communicating one-on-one with a teacher.

NOTE: This course fulfills the prerequisite for Physics. Students are encouraged to take the course before taking Physics. Students must be concurrently enrolled in Earth/Space Science for the Fall Semester. This registration will be removed upon successful completion of the Earth/Space Science Online summer course.

Limited to 20 students per session.
